

TUSHAR RAVI SHINDE

Software Engineer (Fresher) · Backend & Full-Stack Development · Mumbai / Navi Mumbai / Thane
+91 91528 45738 · tusharshinde186306@gmail.com · [Portfolio](#) · [github.com/2sharr](#)

PROFESSIONAL SUMMARY

Final-year B.E. Information Technology student with hands-on experience architecting and deploying 6+ full-stack, mobile, and AI-integrated projects using Python, Flask, Java, and JavaScript. Engineered REST API-backed web applications, implemented NLP-driven automation pipelines, and shipped a production-grade Android app with persistent local storage. Completed a backend-focused internship where automation scripts reduced manual processing overhead. Solid foundation in Data Structures & Algorithms, Object-Oriented Programming, and relational database design. Actively practising LeetCode DSA and expanding into AI/ML tooling. Seeking a Fresher Software Engineer role in Mumbai / Navi Mumbai / Thane to contribute to backend and full-stack development in a growth-oriented engineering team.

TECHNICAL SKILLS

Languages	Python (Primary), JavaScript, Java, C
Frameworks	Flask, React (JS), FastAPI, Streamlit, Tailwind CSS
Databases	MySQL (normalised schema design, complex queries), MongoDB, SQLite
Tools & Platforms	Git & GitHub, VS Code, Android Studio, Postman, Joblib
Core CS Concepts	Data Structures & Algorithms (DSA), OOP, REST API Design, CRUD Architecture
AI / ML Exposure	NLP (text summarisation pipelines), SHAP (model explainability), Scikit-learn, Google Gemini API, OpenAI API
DevOps Basics	Docker (containerisation), CI/CD concepts
Currently Learning	AI Automation, C#, Advanced DSA (LeetCode — active)

EDUCATION

B.E. — Information Technology

Expected: June 2027

Bharati Vidyapeeth College of Engineering, Navi Mumbai (Affiliated: Mumbai University)

- Currently in Semester 5 of B.E. (lateral entry via Diploma); relevant coursework: DBMS, Computer Networks, Operating Systems, Software Engineering, Data Structures & Algorithms, AI & ML.

Diploma — Information Technology

Completed: 2024

Government Polytechnic, Thane

- Sem 5: 88.24% | Sem 6: 88.00%** — consistently top-tier academic performance demonstrating sustained technical aptitude.

INTERNSHIP EXPERIENCE

Python Developer Intern — IGNITECH

2024 · 2 Months

- Engineered Python automation scripts that eliminated repetitive backend data-handling tasks, reducing the team's manual processing overhead for internal workflows.
- Managed the full Git version-control lifecycle — created feature branches, committed structured changes, raised pull requests, and resolved merge conflicts — ensuring clean, production-ready code history.
- Authored technical documentation for 2+ project modules, accelerating onboarding time for new contributors and improving knowledge transfer across the team.

PROJECTS

Explainable Model Playground

FastAPI · React · Python · SHAP · Scikit-learn · Joblib

- Architected a full-stack ML interpretability platform using FastAPI (backend) and React (frontend) that enables users to upload CSV datasets, train models, and visualise SHAP-based global and local explanations in real time.
- Implemented model validation, residual plot generation, and prediction support, providing end-to-end model analysis from training to inference.
- Engineered an automated PDF report export feature delivering structured model-interpretability reports, reducing manual documentation effort.

AI Coding Assistant Chatbot

Flask · Python · OpenAI API · MongoDB · JavaScript · Tailwind CSS

- Developed a web-based coding assistant integrating the OpenAI API to deliver real-time programming help, contextual debugging support, and language-specific code suggestions across multiple languages.
- Engineered a Flask backend with CORS-enabled REST API routing and implemented MongoDB storage for persistent chat-session management, supporting login/logout flows and full chat-history retrieval.
- Integrated browser-based Speech Recognition for voice-driven query input, broadening accessibility and improving the overall developer experience.

Tourism Management System

Python · Tkinter · MySQL · Pillow

- Engineered a desktop tourism-management application featuring a custom Tkinter GUI for traveller data collection, with full CRUD operations (create, read, update, delete) backed by a normalised MySQL schema.
- Implemented Treeview-based record selection, input validation, and form-reset controls, reducing data-entry errors and improving overall usability.

YouTube Video Summariser

Python · Streamlit · Google Gemini API · YouTube Transcript API

- Developed a Streamlit web application that extracts YouTube transcripts via the YouTube Transcript API and generates AI-powered summaries using Google Gemini, supporting English, Hindi, and Marathi output.
- Integrated thumbnail preview, dynamic loading feedback, and robust error handling for invalid links and missing transcripts, delivering a polished, production-ready user experience.

To-Do List App — Android

Java · Android Studio · SQLite

- Engineered a native Android application with full task lifecycle management (create, read, update, delete), persistent local storage via SQLite, and robust input validation preventing empty or duplicate entries.
- Implemented complete Android activity lifecycle handling to ensure data integrity across app pauses, resumes, and device-rotation events.

Education Multi-Page Website

HTML · CSS · JavaScript

- Built a responsive, multi-page education website with dedicated sections for courses, faculty, reviews, and pricing — demonstrating frontend layout proficiency and attention to UI organisation.

Flappy Bird Desktop Game

Java · Swing · AWT

- Developed a Flappy Bird-style desktop game using Java Swing with timer-driven rendering, keyboard/mouse controls, physics-based gravity, collision detection, and multi-screen state management (start, gameplay, game-over).

CERTIFICATIONS & ACHIEVEMENTS

TCS iON Career Edge — Young Professional

TCS iON · 1 Month

- Completed TCS's industry-readiness programme covering professional communication, workplace ethics, and software development fundamentals.

INTERESTS & ACTIVITIES

Backend & full-stack web development · AI/ML tooling and automation · Open-source contributions · EdTech product development · LeetCode DSA practice · Photography, video editing & content creation
